

One Sheet Wonder - 12x12 Stampin' Up DSP  
 Class by Tracie Clarke: [stampwithtlc.com](http://stampwithtlc.com)

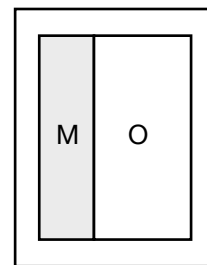

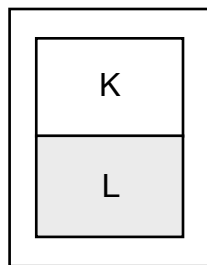

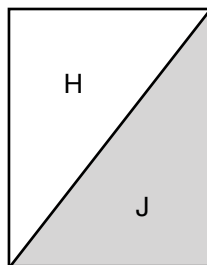

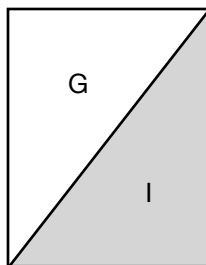

hint: when cutting this diagonal, place the two pieces of DSP together with the same pattern side facing each other so that you can make two identical cards.

Instead of using a normal 4.25" x 5.5" card base I cut them down to 4" x 5.5"

The shaded shapes mean to flip the dsp to the other side

The sketches to the left do not show a mat, but if you would like to mat your cards as I did cut your mat to: 3.75" x 5.25"
