Start by adhering the Basic White Piece to the inside of the card base.

Lay the larger piece of DSP on top of the white and close the 1 1/4" card front on top to see where you should put the glue. Add the glue to the DSP being sure not to extend past where the card front will attach to it. Close the card front to attach the DSP.

Adhere the smaller piece of DSP to the Card Front.

Stamp your sentiment and adhere to the DSP and then decorate with dragonflies or whatever punch you may have.
