

Angled Z Fold Card 1

Card base 5 1/2" x 8 1/2"
scored on the long side
at 2 1/8" and 4 1/4"

To Fold a Z-fold card
base:

Simply fold on the 4
1/4" scored line like you
would a regular card.

Then fold on the 2 1/8"
scored line so that the
front of the card is
folded back on itself.

Use template provided in this PDF to cut angle on the top of the card.

The template also provides the correct angle for cutting your DSP.

The largest section of the card will need a 4" x 5 1/4" piece of DSP and then cut at an angle.

The smaller sections I start by cutting strips measuring the length of the paper by 1 7/8" then you can use the template to cut the proper length at the proper angle.

Decorate as you desire. The tools and materials I used to decorate my version are listed on the facing page.

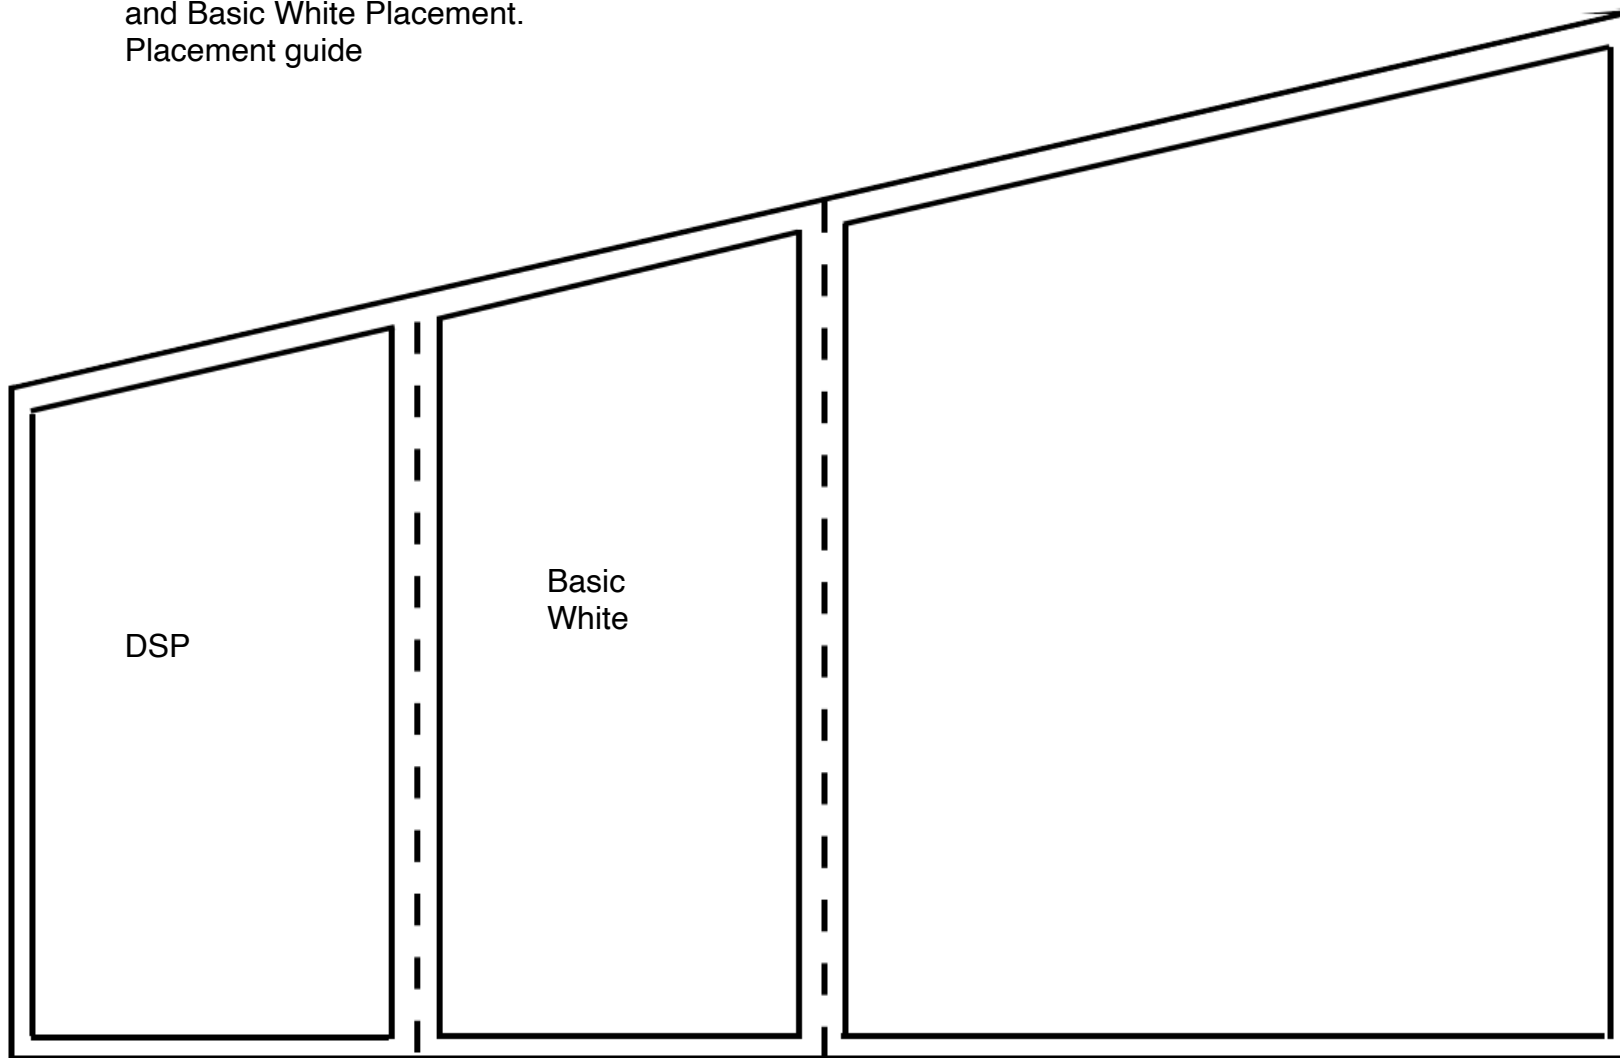

Angled Z Fold Card 2

Product List

- [Joy Of Christmas 12" X 12" \(30.5 X 30.5 Cm\) Designer Series Paper \[161958\] \\$12.50](#)
