

Project 10

1 - 6" x 6" piece of DSP

Score 2 sides at 2 5/8"

Score 2 sides at 1 1/2"

The green lines are formed in assembly

Assembly Instructions:

- Fold and Burnish along the Red and Blue Score lines. Reopen
- Fold each corner so that the blue line (A) meets the red line (B). This fold forms the corner of the box and forms the green score line. Repeat for each corner.
- Open the DSP back up and put glue on each corner inbetween the green and the red lines only.
- Fold along the red lines so that each side flap is folded to the middle section. The corners are now glued to the center section, but you can still lift up the center of the flaps to form the box.
- The box is better visualized in the video v/s the above explanation. Go to: <https://youtu.be/AtC1SRMgKig> to watch the video.
- After the box is formed, glue 1/2 the circle die cut to the back and fold over to close the box. Use a hook and loop (velcro) dot to secure the flap.
- Decorate with the broom diecut from the SDSP pack and add a sentiment. The sentiment piece is 1/2" x 1 3/4"
